VinChip Systems Announces Immediate Availability of AHB to PCI Wrapper Module

San Jose, CA. April 21st 2006- VinChip Systems Inc. one of the leading providers of USB (Universal Serial Bus) Intellectual Property announced immediate availability of AHB to PCI Wrapper Module for ease of testing AHB based systems on an PCI Environment and for certifying AHB(AMBA) peripherals in PCI-SIG.

Features:

o VHDL / Verilog source code provided along with synthesis scripts

o Compliant with AMBA Specification (Rev 2.0)

o Compliant with PCI Specification (Rev 2.3)

o Low cost Architecture with low gate count

o More flexibility with ease of Integration to target hardware

o Support for INCR burst

o Supports Sequential and Non Sequential transfers

o Fully synthesizable IP

o Reference software drivers available

o Functionally proven (FPGA)

For more info. on the above product please contact info@vinchip.com

About VinChip Systems:

VinChip Systems was founded to fill the design productivity gap brought about by advances in semiconductor manufacturing and reducing product life cycles. VinChip's current focus is on developing IP's for USB, PCI express, and Wireless USB along with associated software stacks and in providing design services. It is currently developing solutions for Computing, Networking, Consumer electronics, Embedded systems, Avionics and Industrial Systems. VinChip offers substantial cost savings to its customers by providing proven IP's and design services on-site, or at its design centers located in San Jose and India.
